Objective

Final-year Computer Science student with a strong interest in Data Science and Machine Learning. I have worked with real datasets, built and deployed ML models, and developed full-stack web applications during my academic journey. I am curious by nature, enjoy picking up new tools, and like solving problems that have a clear, measurable outcome.

Experience

Full Stack Developer Intern May–June 2025
Potential Tutorial, Jaipur, Rajasthan 45 Days

EduPulse | *PHP, MySQL, Bootstrap, jQuery, HTML, CSS* 🐙 [GitHub](#) | 🌐 [Live](#)

- Managing student data across fees, attendance, and tests was entirely manual, causing delays and errors for administrative staff.
- Independently built a full University Management System from scratch within 45 days, architecting a role-based portal covering 3 admin modules for 500+ students with optimised SQL queries and a responsive UI.
- Delivered all modules on schedule, reducing administrative data-handling effort by 40%.

Education

B.Tech in Computer Science and Engineering — CGPA: 8.45 (till 5th Sem)
Jaipur Engineering College and Research Centre 2027, Jaipur

Senior Secondary Education — 84.8%
Vidyasthali Public School 2023, Jaipur

Secondary Education — 71.4%
Vidyasthali Public School 2021, Jaipur

Skills

- Programming Languages:** C++, Python, HTML, CSS
- AI / ML:** NumPy, Pandas, Scikit-learn, TF-IDF, XGBoost
- Web Development:** Bootstrap, jQuery, Ajax, PHP, Vercel, REST APIs
- Computer Fundamentals:** Data Structures & Algorithms, DBMS, Computer Networks
- Tools & Platforms:** Git, GitHub, MySQL, Salesforce
- Relevant Coursework:** C++, Python, Web Development, SQL, Data Science, Machine Learning

Projects

Customer Churn Prediction System | *Python, Flask, Scikit-Learn, HTML, CSS* 🐙 [GitHub](#) | 🌐 [Live](#)

- Telecom companies lacked an automated way to identify customers likely to churn, resulting in reactive and costly retention efforts.
- Trained an XGBoost model on 7,000+ customer records with feature engineering and deployed it via a Flask REST API with a live dashboard and recommendation engine.
- Achieved 85% ROC-AUC score and reduced retention planning time by 30%.

Resume Screening System | *Python, Flask, Scikit-Learn, NLP, HTML, CSS* 🐙 [GitHub](#) | 🌐 [Live](#)

- Recruiters screening large applicant pools manually was slow, inconsistent, and prone to overlooking qualified candidates.
- Built a Flask app with PyPDF2 for PDF extraction and a custom NLP pipeline using optimised regex and set-theory algorithms for automated skill matching.
- Processed 100+ profiles simultaneously in under 10 seconds, cutting manual screening effort by 70%.

Achievements

- Completed Deloitte Data Analytics Job Simulation via Forage (Sep 2025). [🔗](#)

Certifications

- NVIDIA Certification — Fundamentals of Deep Learning [🔗](#)
- Oracle Certified Data Science Professional (OCI 2025) [🔗](#)
- Salesforce Agentblazer Workshop — Trailhead (July 2025) [🔗](#)
- Online Summer Internship — Web Designing using PHP & MySQL — CEG [🔗](#)
